

## INDUSTRIAL

# Entertainment Industry Power Technician

An entertainment industry power technician works in film, television, live performance, trade shows, special event productions and carnivals by doing the following: evaluating job requirements; planning, building, installing, maintaining and disassembling power distribution systems, including both main and subdistribution systems; designing and installing temporary distribution systems; installing, controlling and disassembling lighting and managing portable power supplies including maintenance of batteries.

Do you have a good mechanical aptitude? Do you have good vision? Are you able to tell the difference between colours? Do you enjoy learning about and fixing different systems and components? Are you able to stand or sit for long periods of time? Would you be able to travel for work?
